

GWEI NAME SERVICE

Brand Book

Immutable. Unruggable. Governance-free.

THE THESIS

You can just do things.

GNS is the Gwei Name Service, a neutral fork of wei-names, stripped to immutable code: unriggable, governance-free, builder-friendly. Made for the people, not large token holders or well connected service providers. There is no DAO, no foundation, no native token.

Fees are fixed in ETH and locked in the contract forever, removed from circulation. The focus moves to bottom-up value creation, not top-down profit extraction. The GNS contract has no owner and no admin. It's transparent, eternal, ETH-friendly, and CROPS-aligned.

What GNS is for

GNS is not a replacement for ENS, but a complement. A naming service built from the ground up for the masses, the underdogs, cypherpunks, for people who just do things, and for the right reasons. Everyone can contribute, nobody is in control.

LOGO

Just a dot.

The logo is a single green dot, the dot in .gwei. Nothing to decode, no marketing fluff. It says what the project is: simple, honest, never pretentious, always transparent. No symbols hiding a meaning. What you see is what you get.

The main wordmark logo consists of the text 'gns●gwei' in a lowercase, sans-serif font. A single green dot is positioned between 'gns' and 'gwei'.

GWEI NAME SERVICE

favicon / avatar

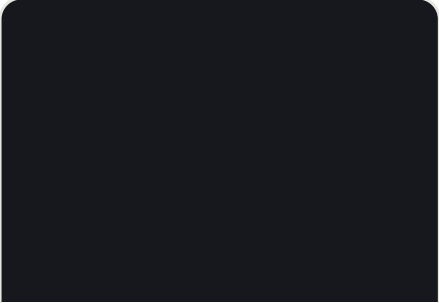

the community (optional)

The dot is the favicon and the avatar; the wordmark is gns●gwei with the dot carrying the one green accent, and GNS is the short form. When the brand needs to show the community, the one dot multiplies into many equal dots, with no one in the center.

COLOR

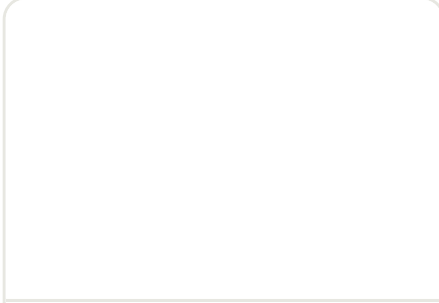

Ink, paper, one green.

Two neutrals and a single accent. **Green is the little guy**, used sparingly for the dot, calls to action, and the one thing on a page that matters most. Ink and paper do everything else.

Ink
#16181D

Text, structure, the establishment in illustrations.

Paper
#FFFFFF

Backgrounds. Keep it open and uncrowded.

Gwei green
#4E9A2F

The dot, accents, and CTAs only. The little guy. Matched to the live app.

Slate
#6B7280

Secondary text, captions, labels.

TYPOGRAPHY

Grotesk, sans, mono.

SPACE GROTESK · DISPLAY & LABELS

Immutable, unruggable, governance-free

Headlines, section titles, and uppercase labels.

INTER · BODY

A name on Ethereum that belongs to no one and everyone.

Running text and descriptions. Set at 12pt, line-height 1.6.

IBM PLEX MONO · CIDS, PRICES, CONTRACT

0.0005 ETH · bafybeib3k7q...m2

Content hashes, prices, and anything quoted from the contract.

VOICE & THEMES

Believe, then deliver.

The voice is simple, direct, action-oriented and jargon-free. Say less, build more. Every claim is plain and provable, straight from the contract, with nothing hidden or embellished.

GNS is people-driven. Anyone can contribute: start building, open a pull request, and let's talk. Or build GNS into your own project, make it happen. That is what "you can just do things" means. Show up and deliver.

Three key themes backed by code: immutable, unruggable, governance-free.

● Immutable

Every fee is a compile-time constant. No admin, no upgrade path, no constructor to seed privileged state. The rules were frozen at deployment. (ENS is upgradeable by its DAO.)

● Unruggable

No owner and no withdraw function. The ETH paid on registration is locked in the contract forever, so no one can drain it or change the terms. (ENS routes fees to a treasury controlled by the DAO.)

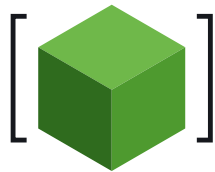

● Governance-free

No token, no DAO, no vote. Nothing to capture. (One ENS token holder has a de facto monopoly over governance.)

ILLUSTRATION

Flat and two-color.

Flat, two-color, geometric. Green for the subject, near-black for structure and labels.
Simple symbols, no texture, no detail, no scenes. Each one says one thing.

**Immutable**

Frozen at deployment. No admin.

**Unruggable**

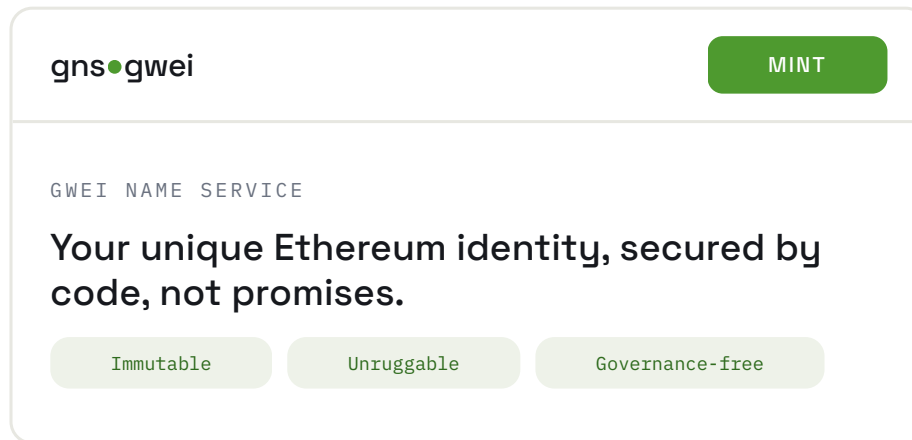

Funds locked. Nothing to drain.

**Governance-free**

No token, no vote, no ruler.

APPLICATIONS

The system, applied.

THE WEBSITE

A community site at gns.gwei, hosted on IPFS. One way to use the brand, not the official GNS site. Hero, three topic rows pairing a flat two-color image with short copy, and a clear path to mint on gwei.domains. It hands off to the dapp and never touches a wallet.

BRAND CONSISTENCY

The dot, the gwei green, Space Grotesk and Plex Mono, and the flat two-color images appear identically on the site and in every asset. One system, applied everywhere.

Gwei Name Service — Brand Book

An independent concept brand system for the Gwei Name Service, a neutral, ownerless fork of wei-names. Created as a marketing exercise and offered to the community. Not an official GNS publication.
